Yesterday a group of Hackers have once again managed to gain access to government files, this time also claiming to have breached a United Nations website <https://acnur.org> and leaked the user, password (not in clear text), login, personal phone number and other information.

The group Sector 404 who claim to be working along side the infamous hacking group Anonymous. Other people's information that has been shown to have been leaved via [Pastebin](#) are:

-Dirk Wildt <https://wildt.at.die-netzmacher.de/> wildt@die-netzmacher.de

-Schaffstein <https://association.typo3.org/press/press-contact/> soeren@typo3.org

Now presuming i am right i wonder how much news coverage this will get. False Flag Operation maybe???

Are the government hacking themselves to create the fear. Is this Intelligence or is this counter intelligence? #OP Cartel never got the right effect and neither did the book dealing turncoat but the Presidents email details leached with other personal info?

Is this just another way of helping things move along faster towards a NWO?
